## Dear Customer

We offer you the strongest magnets in many shapes and sizes. Nearly all of our magnets are made of Neodymium Iron Boron (NdFeB). These are the strongest permanent magnets in existence. They are many times stronger than typical magnets.

You have to experience these magnets yourself in order to understand why they are called "super magnets".

This catalogue displays the same articles that are available in our web shop. You can find more detailed information and additional photos in the item descriptions at [www.supermagnete.ch](http://www.supermagnete.ch). We have made every effort to simplify the order process for you.

I hope you enjoy your shopping experience!

## Rod magnets made of neodymium

All rod magnets have their north and south poles on the even circular surfaces (axial magnetisation). The sole exception is the S-04-10-DN, which is diametrically magnetised.

## Magnetic spheres made of neodymium

Please note: Due to the danger of swallowing, magnetic spheres are not suitable as toys for children and should be kept out of reach of small children. If they swallow several small magnets, they can accumulate in the intestines and cause life-threatening injuries.

<p><b>K-03-C</b> Sphere magnet Ø 3 mm, holds approx. 130 g Weight: 0.11 g Chrome-plated (Ni-Cu-Ni-Cr) Magnetisation: N42 strength: approx. 130 g</p>	<p>Price in CHF</p> <p>20 pcs. 0.40 ea. from 60 pcs. 0.34 ea. from 140 pcs. 0.31 ea. from 360 pcs. 0.27 ea.</p>	<p>Unleash your creativity! ## Ring magnets neodymium

Most ring magnets have their north and south poles on the even circular surfaces (axial magnetisation). The few exceptions that are diametrically magnetised are especially marked.

## Cone magnets neodymium

These neodymium magnets are cone-shaped. On the small circular area the magnetic field lines are bundled, which gives the magnets a very high adhesive force. They are perfectly suitable for whiteboards, magnetic boards, etc. The stump holds notes securely and it can be easily removed by pulling it off to the side. If the base is attached to a metal surface, however, it is hard to remove.

<p><b>CN-10-05-04-N</b> Cone magnet Ø 10/5 mm, height 4 mm, holds approx. 1.2 kg Weight: 1.4 g Nickel-plated (Ni-Cu-Ni) Magnetisation: N45 strength: approx. 1.2 kg Sticks to whiteboard: 13 A4 sheets Colour: Silver-coloured</p>	<p>Price in CHF</p> <p>5 pcs. 0.76 ea. from 15 pcs. 0.68 ea. from 40 pcs. 0.62 ea. from 120 pcs. 0.56 ea.</p>	<p>These cone magnets are neodymium magnets with special features: The magnetic flux lines are bundled on the small circular surface, and therefore the magnets possess a high adhesive force. ## Waterproof neodymium magnets: rustproof & with scratch protection

The neodymium magnets in this group are entirely coated by a layer of rubber, which provides the following advantages:

Scratch protection: Delicate surfaces, such as whiteboards or magnetic glass boards, are well protected

Waterproof: These magnets are rustproof and can be used outdoors as long as the rubber coating stays intact

Friction: The rubber coat substantially increases the magnetic adhesive force in shear direction

Due to the rubber coating the maximum adhesive force of these magnets is slightly lower, however, compared to similar-sized neodymium magnets without coating.

## Screw-on neodymium magnets

Flat countersunk neodymium disc and block magnets with one or two holes can be fastened with a countersunk head screw. They are only 4 mm thick and therefore very discreet for hanging up signs, tools, etc. Screw-on magnets are very popular in the areas of kitchen installations, booth and store construction, signage technology, furniture manufacturing, etc.

## Pot magnets with countersunk hole screw-on

Distinctive feature: These magnets can be fastened with a countersunk screw.

Principle: The magnets are embedded in a steel pot. The steel pot increases the adhesive force of the magnet on direct contact with a thick iron surface. If there is no direct contact with the counterpart, or if the steel plate is thin, painted or rough, you won't be able to put as much strain on it.

Shear force: The indicated adhesive force was measured perpendicular to the surface to which the magnet should stick. It takes a lot less strength to move the magnet sideways. Therefore, you won't be able to put as much strain on a pot magnet if you use it on a wall as opposed to using it on the ceiling.

Rust: These magnets are not rust-free and therefore intended for dry indoor use.

## Hook magnets neodymium: strong & practical

Distinctive feature: These magnets can be used to hang up objects. The hook can be unscrewed. You have the choice of silver, white, black and green colour.

Principle: The magnets are embedded in a steel pot. The steel pot increases the adhesive force of the magnet on direct contact with a thick iron surface. If there is no direct contact with the counterpart, or if the steel plate is thin, painted or rough, you can strain it much less.

Shear force: The indicated adhesive force was measured perpendicular to the surface to which the magnet should stick. It takes a lot less strength to move the magnet sideways. Therefore, you can put a lot less strain on a pot magnet when you use it on a wall as opposed to using it on the ceiling.

Rust: These magnets are not rust-free and therefore intended for dry indoor use.

## Channel magnets

Channel magnets are rectangular or square pot magnets that can be fastened with a countersunk head screw. They consist of a U-shaped steel profile into which a neodymium block magnet is embedded. This design strengthens the holding power of the magnet enormously at direct contact with a counterpart. Additionally, the steel coating protects the fragile magnet from damages caused by repeated blows.

## Eyelet magnets neodymium

Distinctive feature: These magnets are suitable for securely hanging up objects. The eyelet can be removed. You can choose between silver-coloured and white eyelet magnets. The latter are barely noticeable on white walls and ceilings. The silver eyelet magnets are slightly cheaper and stronger.

Principle: The magnets are embedded in a steel pot. The steel pot increases the adhesive force of the magnet on direct contact with a thick iron surface. If there is no direct contact with the counterpart, or if the steel plate is thin, painted or rough, you won't be able to put as much strain on it.

If there is no direct contact with the counterpart, or if the steel plate is thin, painted or rough, you won't be able to put as much strain on it.

Shear force: The indicated adhesive force was measured perpendicular to the surface to which the magnet should stick. It takes a lot less strength to move the magnet sideways. Therefore, you won't be able to put as much strain on a pot magnet if you use it on a wall as opposed to using it on the ceiling.

Rust: These magnets are not rust-proof and therefore intended for dry indoor use.

## Pot magnets with counterbore hole screw-on

Distinctive feature: These magnets can be fastened with a screw without countersink.

Principle: The magnets are embedded in a steel pot. The steel pot increases the adhesive force of the magnet on direct contact with a thick iron surface. If there is no direct contact with the counterpart, or if the steel plate is thin, painted or rough, you can strain it much less.

Shear force: The indicated adhesive force was measured perpendicular to the surface to which the magnet should stick. It takes a lot less strength to move the magnet sideways. Therefore, you can put less strain on a pot magnet if you use it on a wall as opposed to using it on the ceiling.

## Pot magnets with screw socket

Distinctive feature: These pot magnets have a screw socket, into which you can screw hooks, eyelets, etc. We also carry identical hook magnets as well as eyelet magnets.

Principle: The strong neodymium magnets are embedded in a steel pot. The steel pot increases the adhesive force of the magnet on direct contact with a thick iron surface. If there is no direct contact with the counterpart, or if the steel plate is thin, painted or rough, you won't be able to put as much strain on it.

Shear force: The indicated adhesive force was measured perpendicular to the surface to which the magnet should stick. It takes a lot less strength to move the magnet sideways. ## Pot magnets & magnet systems with ferrite magnets

Distinctive feature: These magnets are ferrite and not neodymium magnets. They have therefore a lower adhesive force and are larger. But are cheaper than neodymium magnets and can be used outside as well.

Principle: The magnets are embedded in a steel pot. The steel pot increases the adhesive force of the magnet on direct contact with a thick iron surface. If there is no direct contact with the counterpart, or if the steel plate is thin, painted or rough, you won't be able to put as much strain on it.

Shear force: The indicated adhesive force was measured perpendicular to the surface to which the magnet should stick. It takes a lot less strength to move the magnet sideways. Therefore, you won't be able to put as much strain on a pot magnet if you use it on a wall as opposed to using it on the ceiling.

Rust: These magnets are rust-proof and can therefore be used outside and in wet surroundings as well. The pots surrounding the magnets, however, may develop surface rust over time.

## Screw-on metal plates & metal discs with a hole

These are not magnets! These metal discs are suitable as counterparts for our magnets, e.g. hook or block magnets with hole.

They can be easily screwed onto non-magnetic surfaces with a countersunk bolt.

## Self-adhesive metal discs: ideal counterparts for magnets

These metal discs are suitable as counterpart for our magnets, e.g. disc or hook magnets. Thanks to the self-adhesive back, they can be easily attached to smooth surfaces.

## Rubber caps & self-adhesive rubber discs: Skid and scratch protection all in one

These rubber caps can be put over the bottom side of pot magnets to protect delicate surfaces, plus the friction increases the load capacity of the magnet in shear direction.

## Magnetic adhesive tape for flexible attachments

Self-adhesive magnetic tape can be used to inconspicuously attach non-magnetic objects (e.g. a plastic or aluminium sign) to metal surfaces. The self-adhesive strips also adhere to each other, so you can combine two non-magnetic objects. It's perfect for attaching flexible fly screens to windows and doors.

## Office magnets and noticeboard magnets: strong hold on whiteboard and magnetic

These strong neodymium office magnets are perfectly suitable for whiteboards, magnetic walls and school blackboards. They are multiple times stronger than standard ferrite office magnets.

On magnetic glass boards, however, only certain types of office magnets can be used, depending on the thickness of the glass.

<p><b>M-102</b> Magnet with handle small, holds approx. 5 kg strong ferrite magnet in a steel pot with black knob handle Ø 38 mm Weight: 43 g strength: approx. 5 kg</p>	<p>Price in CHF 1 pc. 6.50 ea.</p>	<p>Strong, sturdy magnet with handle and 5 kg adhesive force for versatile hanging of clothing, bags or signs, e.g. in the workshop or office.</p>
<p><b>M-103</b> Magnet with handle medium, holds approx. 9 kg strong ferrite magnet in a steel pot with black knob handle Ø 51 mm Weight: 83 g strength: approx. 9 kg</p>	<p>Price in CHF 1 pc. 8.20 ea.</p>	<p>Strong, sturdy magnet with handle and 9 kg adhesive force for versatile hanging of clothing, bags or signs, e.g. in the workshop or office.</p>
<p><b>M-104</b> Magnet with handle large, holds approx. 12 kg strong ferrite magnet in a steel pot with black knob handle Ø 67 mm Weight: 200 g strength: approx. 12 kg</p>	<p>Price in CHF 1 pc. 9.95 ea.</p>	<p>Strong, sturdy magnet with handle and 12 kg adhesive force for versatile hanging of clothing, bags or signs, e.g. in the workshop or office.</p>
<p><b>M-95</b> Disc magnets with silicone coating, holds approx. 800 g board magnets neodymium, adhere on both sides set of 10, Ø 18 mm assorted colours Weight: 76 g/set strength: approx. 800 g</p>	<p>Price in CHF 1 set 23.70/set</p>	<p>10 in a set, colour-assorted (2 each in blue, yellow, grey, green, orange). Good grip, coated with silicone.</p>
<p><b>M-98</b> Sphere magnets with silicone coating, holds approx. 600 g board magnets neodymium set of 4 Ø 12 mm, blue Weight: 45 g/set strength: approx. 600 g</p>	<p>Price in CHF 1 set 11.25/set</p>	<p>These blue sphere magnets are coated with silicone, making them especially easy to grip. They are great for use on whiteboards, magnetic boards and glass memo boards.</p>
<p><b>M-OF-S08</b> Knob magnets with metal casing, holds approx. 1.5 kg office magnets neodymium with grooved handle Weight: 6 g strength: approx. 1.5 kg</p>	<p>Price in CHF 10 pcs. 1.95 ea.</p>	<p>Neodymium knob magnets with metal casing. The grooves on the grip ensure that you can easily remove these magnets from ferromagnetic surfaces.</p>
<p><b>M-OF-W08</b> Office magnets with metal casing, holds approx. 1.5 kg neodymium magnets edge length 8 mm Weight: 4 g strength: approx. 1.5 kg</p>	<p>Price in CHF 10 pcs. 1.85 ea.</p>	<p>This nickel-coated metal casing contains a small but strong neodymium magnet.</p>

## Magnetic name badges: needle-free attaching

Magnetic name tags have a clear advantage over others that require needles: The clothing won't be damaged and the tags are held in place securely thanks to super magnets. Magnetic name tags are therefore the perfect companion for weddings, congresses or other festive events.

The larger version of Key rack magnetic 32 cm. 50 instead of 32 cm long and with 11 magnetic docks for keys. Installation material (3 magnetic wall pins) is included.
<b>FO-3</b> Key rack magnetic 32 cm magnetic bar for storing keys made of pear wood for 6 keys Weight: 160 g	Price in CHF 1 pc. 17.80 ea.	Magnetic key rack made of solid oiled peartree wood.
<b>FO-7</b> Key rack magnetic extra strong for storing keys stainless steel, with felt coating for 8 keys Weight: 680 g	Price in CHF 1 pc. 49.90 ea.	Magnetic key rack in a league of its own. Eight powerful magnets on the back of the steel plate (25 x 15 cm) guarantee a rock-solid hold on your keys. Thanks to a black felt cover, even throwing keys at the rack from a distance will not damage it.

## Knife racks & knife blocks with strong magnetic power

Magnetic knife strips and magnetic knife blocks are nicely shaped and practical kitchen accessories. Knives adhere thanks to embedded neodymium magnets and don't have to be stored in the drawer anymore where they can easily become dull and scratched.

<p><b>FO-10</b> Knife rack magnetic 32 cm magnetic knife holder made of stainless steel for 6 knives up to 500 g Weight: 300 g</p>	<p>Price in CHF 1 pc. 25.30 ea.</p>	<p>Magnetic knife rack made of solid brushed V2A stainless steel (1.5 mm thick).
